

Focus Group Discussions

1. Focus group on products from data assimilation in hydrologic models (Aaron Boone, Eric Wood, Cedric David)
2. Focus group on products from data assimilation of SWOT and multisensor data in hydrodynamic models (Jerome Monnier, Kostas Andreadis)
3. Focus group on cycle-based vector products (Tamlin Pavelsky, Yongwei Sheng, Jean-Francois Cretaux)
4. Focus group on wetland products (Marc Simard, Stephane Calmant)

Focus Group Key Questions

1. What are the products that you envision producing?
2. What are the SWOT inputs required to produce these products?
3. What ancillary datasets would you need to produce the products?
4. What models or kinds of models would you need to produce the products?
5. What are the key challenges, and what work needs to be done to address these challenges?
